

PURE PICKLEBALL & PADEL

PURE ACADEMY

Coaches Workbook — Six-Week Practice &
Competition Guide

COACH

TEAM

SEASON

HOW TO USE THIS PACKET

Built to be taken directly to practice. The first hour develops skills and decision-making; the final hour is reserved for live competition, ladder play, partner evaluation and applying the weekly theme.

THE FOUR COACHING QUESTIONS

1 Anticipation

Did the player recognize what was happening and prepare early?

2 Court Positioning

Was the player in the right place before, during and after the shot?

3 Shot Selection

Did the player choose the right shot for the situation?

4 Execution

Did the player execute the shot they intended?

NON-NEGOTIABLES EVERY WEEK

- ☐ Active warm-up and shadow transition work
- ☐ Serve and return depth test
- ☐ PURE Academy circuit used as a diagnostic
- ☐ Weekly technical/strategy lesson
- ☐ Final hour of competitive games
- ☐ Track wins, losses, partnerships and lineup observations
- ☐ Positive Pickles at the end of practice
- ☐ Give a specific weekly homework assignment

POSITIVE PICKLES

Finish every practice with each player sharing something positive they saw from a teammate — improvement, effort, a great shot, communication, sportsmanship, kindness or encouragement. Competition and team culture should grow together.

OUTSIDE PRACTICE & PRIVATE LESSONS

Encourage players to practice outside team sessions using measurable assignments. If a player needs individualized technical work, coaches may offer private lessons outside team practice so team sessions can continue serving the whole group.

SIX-WEEK DEVELOPMENT MAP

WEEK	FOCUS	OUTCOME
1	Serve & Return	Start the point with an advantage.
2	Third Shot Drive & Drop	Choose the correct third shot and begin the transition.
3	Fourth & Fifth Shot	Read ball height, neutralize pressure and earn the kitchen.
4	Kitchen Play & Dinking	Create pressure with patience and purpose.
5	Speed-Ups & Counterattacks	Attack intentionally and anticipate the next ball.
6	Competition & Team Strategy	Put the complete game together and prepare lineups.

WEEKLY METRICS TO WATCH

- Serve depth percentage
 - Return depth percentage
 - Kitchen arrival percentage while serving
 - Third-shot decision quality
- Reset success under pressure
 - Kitchen patience and attack selection
 - Partnership communication and movement
 - Competitive results and response under pressure

TEAM GOALS FOR THE SIX-WEEK TRAINING BLOCK

Weekly Goal: Build a reliable, deep serve and return that creates an advantage immediately. Depth and consistency come before unnecessary power.

2-HOUR PRACTICE TIMELINE

TIME	FOCUS	COACH NOTES
0:00–0:10	Dynamic warm-up	Movement, dynamic stretching, lateral work, King of the Court or another active start.
0:10–0:18	Shadow transition	Baseline to kitchen: split → prepare → hit → recover → move → split.
0:18–0:28	Serve & return test	Two-minute rounds. Track deep serves and deep returns; switch roles.
0:28–0:40	PURE Academy circuit	Serve deep → return deep down the line → third-shot drive middle/down line → partner protects/poaches → play to 5 and rotate.
0:40–0:58	Serve & return skill block	Target depth, technique and immediate movement after the return.
0:58–1:00	Water + reset	Review one key cue before competition.
1:00–1:55	Competition hour	Games to 11, ladder/challenge matches, partner combinations and weekly skill emphasis.
1:55–2:00	Positive Pickles + homework	Each player shares one positive observation; coach gives the weekly homework.

TEACHING CUES

SERVE

- Open or semi-open stance
- Stay balanced and keep the ball in front
- Bring the hip through contact
- Swing smoothly through the ball
- Finish over the shoulder
- Primary target: deep, inside the final 2–3 feet of the court

RETURN

- Move into position early and organize the feet
- Set/pause before contact when possible
- Keep the ball in front and use a controlled swing
- Return deep
- Hit → move → establish the kitchen

DRILLS & PROGRESSIONS

Two-Minute Deep Serve Challenge

Setup: Place a target line about two feet inside the baseline. Player serves continuously for two minutes. Record deep serves / total serves.

Coaching Focus: Depth, repeatable mechanics and a measurable percentage to beat next week.

Serve + Return Depth

Setup: Server works on depth while returner works on depth and immediately transitions forward. Switch roles after a set number of balls.

Coaching Focus: Returner should not admire the shot — get moving toward the kitchen after contact.

Serve + Return + Third Ball

Setup: Add a third player who prepares to play the third shot after the deep return.

Coaching Focus: Connect the first two shots to the next decision and show why depth matters.

COACH'S EYE — THE FOUR COACHING QUESTIONS

ANTICIPATION

Is the player preparing early for serve/return direction and depth?

SHOT SELECTION

Are players prioritizing high-percentage depth instead of unnecessary pace?

POSITIONING

Does the returner move forward immediately after contact?

EXECUTION

Can the player repeat the same balanced swing under pressure?

COMPETITION HOUR FOCUS

- Deep serves and returns
- Returner reaches the kitchen quickly and under control
- Reduce avoidable serve/return errors
- Begin observing partnership chemistry and initial line potential

PLAYER HOMEWORK

Option 1: Hit 50 serves and record how many land in the final 2–3 feet of the court.

Option 2: Hit 10 serves each to three targets: wide, middle and T.

Option 3: No court: complete 25 slow-motion serve swings focusing on balance, hip rotation, contact in front and finish.

PLAYER GOAL

Come to Week 2 knowing your current serve-depth percentage.

COACH NOTES / PLAYER OBSERVATIONS

Weekly Goal: Learn to choose the correct third shot to help the serving team transition forward. The third shot should create the next opportunity, not just try to end the rally.

2-HOUR PRACTICE TIMELINE

TIME	FOCUS	COACH NOTES
0:00–0:10	Dynamic warm-up	Movement, dynamic stretching, lateral work, King of the Court or another active start.
0:10–0:18	Shadow transition	Baseline to kitchen: split → prepare → hit → recover → move → split.
0:18–0:28	Serve & return test	Two-minute rounds. Track deep serves and deep returns; switch roles.
0:28–0:40	PURE Academy circuit	Serve deep → return deep down the line → third-shot drive middle/down line → partner protects/poaches → play to 5 and rotate.
0:40–0:58	Third-shot decision block	Teach drive mechanics, drop mechanics and when each option is appropriate.
0:58–1:00	Water + reset	Review one key cue before competition.
1:00–1:55	Competition hour	Games to 11, ladder/challenge matches, partner combinations and weekly skill emphasis.
1:55–2:00	Positive Pickles + homework	Each player shares one positive observation; coach gives the weekly homework.

TEACHING CUES

THIRD SHOT DRIVE

- Keep ball in front; feet set before contact
- Open or semi-open stance; stay low
- Use hips to transfer weight and power
- Swing through and finish over shoulder
- Drive with purpose — often straight ahead or through the middle

THIRD SHOT DROP

- Create space and keep ball in front
- Arm extended before contact
- Controlled swing with a forward path
- Finish through and over shoulder
- Avoid scooping excessively underneath the ball

DECISION RULE

- Short/high return may invite a drive
- Low/deep/difficult return may call for a drop
- Look for the returner still moving forward
- Cross-court drops often provide more margin

DRILLS & PROGRESSIONS

Toss & Drive

Setup: Partner softly tosses. Player drives straight ahead for high repetitions.

Coaching Focus: Balance, hip rotation, contact point, extension and finish.

Drive & Block

Setup: Baseline player drives to a kitchen player. Kitchen player blocks with paddle in front and compact motion. Switch roles.

Coaching Focus: Drive control and compact block technique; avoid large backswing.

Kitchen Takeover

Setup: Two players start baseline, two at kitchen. Kitchen team feeds; baseline team must drive/drop and transition. Win the rally, take the kitchen. Only the kitchen team scores; first to 10.

Coaching Focus: Drive straight, drop cross-court, transition together and don't rush forward after a poor shot.

COACH'S EYE — THE FOUR COACHING QUESTIONS

ANTICIPATION

Did the player read return depth, height and opponent movement early?

SHOT SELECTION

Did the ball and opponent position support drive or drop?

POSITIONING

Were feet set and body balanced before contact?

EXECUTION

Did the chosen shot create a manageable next ball?

COMPETITION HOUR FOCUS

- Ask players why they chose drive or drop
- Drive at moving players or useful targets instead of swinging blindly
- Use the third shot to set up the fifth
- Watch whether partners transition together

PLAYER HOMEWORK

Option 1: Hit 25 cross-court drops from each side and record kitchen success.

Option 2: With a partner, complete 20 drive-then-fifth-shot-drop sequences.

Option 3: During one game, mentally evaluate every third shot: was drive or drop the better choice?

PLAYER GOAL

Become intentional about the third shot instead of automatically choosing the same option.

COACH NOTES / PLAYER OBSERVATIONS

Weekly Goal: Read ball height and trajectory, make the appropriate fourth/fifth-shot decision and improve the serving team's ability to earn the kitchen.

2-HOUR PRACTICE TIMELINE

TIME	FOCUS	COACH NOTES
0:00–0:10	Dynamic warm-up	Movement, dynamic stretching, lateral work, King of the Court or another active start.
0:10–0:18	Shadow transition	Baseline to kitchen: split → prepare → hit → recover → move → split.
0:18–0:28	Serve & return test	Two-minute rounds. Track deep serves and deep returns; switch roles.
0:28–0:40	PURE Academy circuit	Serve deep → return deep down the line → third-shot drive middle/down line → partner protects/poaches → play to 5 and rotate.
0:40–0:58	Fourth/fifth-shot block	Train ball-height reads, fourth-shot responses and transition resets.
0:58–1:00	Water + reset	Review one key cue before competition.
1:00–1:55	Competition hour	Games to 11, ladder/challenge matches, partner combinations and weekly skill emphasis.
1:55–2:00	Positive Pickles + homework	Each player shares one positive observation; coach gives the weekly homework.

TEACHING CUES

FOURTH SHOT - BELOW NET

- Bring paddle down
- Use controlled roll/pressure shot
- Aim cross-court or middle to make transition difficult

FOURTH SHOT - HIGH

- Create space
- Keep ball in front
- Use controlled acceleration to attack

FOURTH SHOT - NET HEIGHT

- Block or punch
- Paddle out front
- Compact motion and controlled target

FIFTH SHOT

- Low ball: split → stop → create space → reset/drop → move
- High ball: attack or counterattack
- Do not force the kitchen in one shot — earn it

DRILLS & PROGRESSIONS

Third/Fourth/Fifth Progression

Setup: Two players baseline, two kitchen. Play third, fourth and fifth; initially stop after fifth and discuss decisions, then play out.

Coaching Focus: Separate decision quality from outcome and make players explain what they saw.

Feed the Feet

Setup: Feed toward a transitioning player's feet. Mix in occasional higher balls.

Coaching Focus: Split step, stop, create space, keep ball in front, reset low, then move when allowed.

7-11 Transition Game

Setup: Kitchen team starts with the advantage. Baseline team works forward through live points.

Coaching Focus: Third through sixth shots, patient movement and earning the kitchen.

COACH'S EYE — THE FOUR COACHING QUESTIONS

ANTICIPATION

Can the player read ball height early?

SHOT SELECTION

Low ball = neutralize; high ball = consider attack.

POSITIONING

Does the player stop/split before the opponent hits?

EXECUTION

Can the player reset low enough to earn forward movement?

COMPETITION HOUR FOCUS

- Track Kitchen Arrival Percentage while serving
- Reward teams that transition under control rather than rush
- Evaluate fifth-shot resets after third-shot drives
- Look for split-step timing before opponent contact

PLAYER HOMEWORK

Option 1: Have a partner feed 30 balls to your feet in transition; try to reset at least 20 into the kitchen.

Option 2: During recreational play, make split-step timing your only goal.

Option 3: No partner: complete 10 shadow baseline-to-kitchen sequences: hit → move → split → hit → move → split.

PLAYER GOAL

Become comfortable taking multiple shots to reach the kitchen instead of rushing forward.

COACH NOTES / PLAYER OBSERVATIONS

04

SIX-WEEK DEVELOPMENT MAP

KITCHEN PLAY & DINKING

Weekly Goal: Teach players to think at the kitchen: neutralize when under pressure, create pressure when balanced, and patiently construct attackable opportunities.

2-HOUR PRACTICE TIMELINE

TIME	FOCUS	COACH NOTES
0:00–0:10	Dynamic warm-up	Movement, dynamic stretching, lateral work, King of the Court or another active start.
0:10–0:18	Shadow transition	Baseline to kitchen: split → prepare → hit → recover → move → split.
0:18–0:28	Serve & return test	Two-minute rounds. Track deep serves and deep returns; switch roles.
0:28–0:40	PURE Academy circuit	Serve deep → return deep down the line → third-shot drive middle/down line → partner protects/poaches → play to 5 and rotate.
0:40–0:58	Kitchen decision block	Train lift/reset dinks, push/aggressive dinks and opponent movement.
0:58–1:00	Water + reset	Review one key cue before competition.
1:00–1:55	Competition hour	Games to 11, ladder/challenge matches, partner combinations and weekly skill emphasis.
1:55–2:00	Positive Pickles + homework	Each player shares one positive observation; coach gives the weekly homework.

TEACHING CUES

#1 LIFT / RESET DINK

- Use when under pressure, off balance or needing to neutralize
- Goal: soft, low and short

#2 PUSH / AGGRESSIVE DINK

- Use when balanced with the ball in front and space available
- Goal: more depth/pace toward feet or useful space

DINK TECHNIQUE

- Semi-open stance
- Move feet and create space
- Keep ball/contact in front
- Extend through the ball
- Recover immediately
- Use cross-court angles and inside-foot targets to move opponents

DRILLS & PROGRESSIONS

Straight Dink Games

Setup: Players dink straight across and play mini-games to 5.

Coaching Focus: Move the opponent; don't repeat the same location every ball.

Cross-Court Dink

Setup: Forehand and backhand cross-court repetitions, then live mini-games.

Coaching Focus: Inside/outside foot, depth changes, movement and recovery.

#1 or #2 Decision Drill

Setup: Coach initially calls ONE (reset) or TWO (push). Progress to player choosing independently.

Coaching Focus: Ask why they chose #1 or #2 — build decision-making language.

COACH'S EYE — THE FOUR COACHING QUESTIONS

ANTICIPATION

Is the player reading opponent balance and expected contact?

SHOT SELECTION

Does pressure call for #1, or does balance allow #2?

POSITIONING

Does the player move feet rather than reach?

EXECUTION

Can the player control height, depth and direction?

COMPETITION HOUR FOCUS

- Maintain kitchen position
- Use dinks to create something, not just survive
- Identify opponent weaknesses and impatience
- Do not force speed-ups from bad positions
- Track who stays patient under pressure

PLAYER HOMEWORK

Option 1: Complete 25 straight FH, 25 straight BH, 25 cross-court FH and 25 cross-court BH dinks with a partner.

Option 2: Play a dink game to 11 where a point only counts after intentionally moving the opponent.

Option 3: In one game, do not intentionally speed up until your team has hit at least four kitchen balls.

PLAYER GOAL

Stop dinking randomly — use dinks to create movement, pressure and attackable balls.

COACH NOTES / PLAYER OBSERVATIONS

SPEED-UPS, COUNTERATTACKS & TEAM MOVEMENT

Weekly Goal: Learn when to speed up, how to expect the counterattack, and how partners protect the court together during fast exchanges.

2-HOUR PRACTICE TIMELINE

TIME	FOCUS	COACH NOTES
0:00–0:10	Dynamic warm-up	Movement, dynamic stretching, lateral work, King of the Court or another active start.
0:10–0:18	Shadow transition	Baseline to kitchen: split → prepare → hit → recover → move → split.
0:18–0:28	Serve & return test	Two-minute rounds. Track deep serves and deep returns; switch roles.
0:28–0:40	PURE Academy circuit	Serve deep → return deep down the line → third-shot drive middle/down line → partner protects/poaches → play to 5 and rotate.
0:40–0:58	Hands + team movement block	Speed-up selection, counter readiness and shifting with the ball.
0:58–1:00	Water + reset	Review one key cue before competition.
1:00–1:55	Competition hour	Games to 11, ladder/challenge matches, partner combinations and weekly skill emphasis.
1:55–2:00	Positive Pickles + homework	Each player shares one positive observation; coach gives the weekly homework.

TEACHING CUES

WHEN TO SPEED UP

- Be balanced
- Ball is in front
- Contact point is favorable
- Opponent is vulnerable
- Be ready for the ball to come back
- Speed up → paddle ready → expect the next ball

FAST HANDS / TRIANGLE EFFECT

- The first attack creates the next angle
- Anticipate likely counter direction
- Compact strokes beat big swings in fast exchanges

MIDDLE & LINE

- Player directly across from ball protects line
- Cross-court partner helps protect middle
- Both partners shift as the ball shifts
- Communicate and keep partner spacing connected

DRILLS & PROGRESSIONS

Cross-Court Feed → Straight Speed-Up

Setup: A feeds cross-court to B. B speeds straight to C. C blocks/counters. D protects middle. Rotate all positions.

Coaching Focus: Speed-up selection, immediate paddle recovery, partner coverage and next-ball anticipation.

Fast Hands 30

Setup: Kitchen partners exchange controlled volleys. Goal: 30 in a row before adding pace.

Coaching Focus: Control first; compact preparation; paddle returns to ready.

Shift With the Ball

Setup: Two-player defending team shifts together while feeding team moves ball side to side; then add speed-ups.

Coaching Focus: Line, middle, spacing, paddle readiness and communication.

COACH'S EYE — THE FOUR COACHING QUESTIONS

ANTICIPATION

Did the player expect the counter before it arrived?

SHOT SELECTION

Was the speed-up chosen from a balanced, favorable position?

POSITIONING

Were partners connected and covering line/middle correctly?

EXECUTION

Did the paddle recover quickly enough for the next ball?

COMPETITION HOUR FOCUS

- Was the speed-up appropriate?
- Did the attacker expect the counter?
- Did both partners shift together?
- Who protected line and who helped middle?
- Can the team stay composed in fast exchanges?

PLAYER HOMEWORK

Option 1: With a partner, reach 30 consecutive controlled volleys, then try 40 or 50.

Option 2: Complete 20 controlled speed-up/counter sequences without trying to hit winners.

Option 3: During doubles play, focus only on moving with your partner; after rallies ask whether you stayed connected.

PLAYER GOAL

Expect one more ball after every attack.

COACH NOTES / PLAYER OBSERVATIONS

Weekly Goal: Put the full game together, address the team's biggest needs, and prepare partnerships and initial Lines 1–4 for league competition.

2-HOUR PRACTICE TIMELINE

TIME	FOCUS	COACH NOTES
0:00–0:10	Dynamic warm-up	Movement, dynamic stretching, lateral work, King of the Court or another active start.
0:10–0:18	Shadow transition	Baseline to kitchen: split → prepare → hit → recover → move → split.
0:18–0:28	Serve & return test	Two-minute rounds. Track deep serves and deep returns; switch roles.
0:28–0:40	PURE Academy circuit	Serve deep → return deep down the line → third-shot drive middle/down line → partner protects/poaches → play to 5 and rotate.
0:40–0:58	Team-specific strategy block	Use team data to select the highest-priority skill/strategy need, then move into situational competition.
0:58–1:00	Water + reset	Review one key cue before competition.
1:00–1:55	Competition hour	Games to 11, ladder/challenge matches, partner combinations and weekly skill emphasis.
1:55–2:00	Positive Pickles + homework	Each player shares one positive observation; coach gives the weekly homework.

TEACHING CUES

START WITH THE DATA

- Serve/return depth
- Kitchen arrival percentage
- Third-shot decisions
- Reset ability
- Kitchen patience
- Speed-up selection
- Communication and partnership chemistry

SCOUTING OPPONENTS

- Weaker backhand
- Trouble with pace
- Balls at feet
- Pop-ups under pressure
- Poor movement/transition
- Impatience
- Create a plan rather than hitting randomly

STACKING

- Know why the team is stacking
- Know start position and movement after serve/return
- Choose left/right roles intentionally
- Communicate before the point

LOBBING

- Use intentionally, not as a panic option
- Create height and depth
- Recover after the lob
- Defend with communication and safe movement

DRILLS & PROGRESSIONS

Score Pressure

Setup: Start games at 8-8, 9-9, 8-10 and 10-8.

Coaching Focus: Decision quality, emotional control and closing/coming back.

Target Player

Setup: Assign a strategic target or weakness before the rally/game.

Coaching Focus: Practice scouting and disciplined patterns.

Transition Battle

Setup: Serving team starts baseline and must earn the kitchen against a kitchen team.

Coaching Focus: Apply third/fifth-shot patterns under competition pressure.

Final Challenge Matches

Setup: Use partner combinations and games to help set initial Lines 1–4.

Coaching Focus: Results matter, but also consider improvement, chemistry, attendance, matchups and coach strategy.

COACH'S EYE — THE FOUR COACHING QUESTIONS

ANTICIPATION

Can the player recognize opponent patterns and pressure situations?

POSITIONING

Does the partnership maintain effective spacing and court coverage?

SHOT SELECTION

Can players stick to a high-percentage game plan?

EXECUTION

Can they execute under scoreboard pressure?

COMPETITION HOUR FOCUS

- Create a simple game plan before each match
- Evaluate partnership chemistry and communication
- Test stacking only when it provides a real advantage
- Use pressure-score situations
- Finalize initial Lines 1–4 while reminding players lineups can change weekly

PLAYER HOMEWORK

Option 1: Play at least two games with a likely league partner and choose one strategy before each game.

Option 2: Practice games beginning at pressure scores: 8-8, 9-9, 8-10 and 10-8.

Option 3: Complete a personal scouting report: biggest strength, biggest improvement area, preferred third-shot option, preferred side, what your partner needs from you and one league strategy.

PLAYER GOAL

Arrive at the first league match with a plan, not just a paddle.

COACH NOTES / PLAYER OBSERVATIONS

SECTION TWO

REUSABLE FORMS

Print additional copies of the following pages as needed throughout the season.

SERVE & RETURN PROGRESS TRACKER

Use the same target area each week. Record successful deep balls / total attempts, or a percentage.
